
HomeWorks QS

Unparalleled total home control

LUTRON

In 1962, Joel Spira patented his invention, the solid-state dimmer, and in doing so took how we use lighting to another level. Lighting suddenly became more than “on” or “off.” Creating the right mood became as important as simply illuminating a space. And good lighting evolved into as much of an interior design element as colour, textures, and accessories.

Today, Joel’s Spira’s company, Lutron Electronics, is a worldwide leader in lighting controls. We hold thousands of patents and are known for our innovation, quality, and, above all, our service to our customers.

HomeWorks QS provides sophisticated control of your surroundings, every hour of the day.

HomeWorks QS, designed for exclusive homes, seamlessly integrates the control of electric light and daylight, as well as integrates with audio visual and HVAC systems.

Light Control
Create just the right light for any activity or set moods in specific areas of your home – all at the touch of a button.

Blind Control
Use the sun to your advantage with automated blinds. Convert harsh glare into soft, pleasing light, while preserving your view.

Temperature Control
Adjust heating or cooling systems any time of day, even while you’re away from home.

Audio Control
Fill a room with great sounding music.

Introducing

HomeWorks QS

Discover total home control

Experience the benefit room by room

From the moment you walk through the door, to the time you turn in for the night, HomeWorks QS orchestrates your lights, blinds, HVAC and more for any task or mood.

Entryway page 4

The geofencing feature ensures you'll always come home to a well-lit house.

Living room page 6

Stay comfortable as things heat up during the day. Lower Palladiom blinds from a Palladiom keypad and turn the temperature down a few degrees right from a coordinating thermostat.

Kitchen page 8

Use the "Morning" button on your Palladiom keypad to raise lights and blinds as you prepare breakfast. Or adjust lights and blinds to set the mood for a quiet dinner.

TV room page 10

Create a scene with lights and music for specific occasions, such as entertaining friends.

Bedroom page 12

Turn all of your house lights off with one button press from the comfort of your bed. You can create the ideal light for reading or watching TV, too.

Bathroom page 14

An occupancy/vacancy sensor automatically turns lights off when you leave the room, saving energy. Other controls, such as dimmers and blinds, let you create soft or task lighting.

Outdoor living page 16

Dim exterior lights for barbecues and outdoor dining, with one touch of a button.

Entryway

Walking into a dark home is a thing of the past with HomeWorks QS. When you arrive home in the evening, entrance and specific interior lights will automatically turn on, thanks to geofencing.

The geofencing feature in the Lutron Connect app controls lights based on your location. It can turn lights on when you arrive home and will notify you if you've left lights on when you leave.

You can also use a keypad next to an entryway to conveniently control lights.

Rectangular Palladiom keypad in Satin Nickel

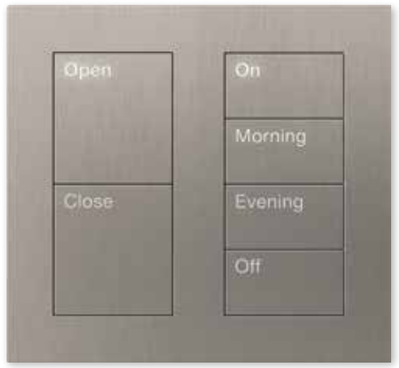
Living room

Create a cosy, welcoming atmosphere for relaxing with family on the weekend or before friends arrive for drinks and nibbles.

Block midday glare with one touch of a Palladiom keypad, while conveniently controlling temperature with the Palladiom thermostat.

Palladiom blinds, thermostat, and keypads complement one another, for a sleek, coordinated aesthetic.

Palladiom shading system bracket in Satin Nickel



Palladiom keypad in Satin Nickel

Palladiom thermostat in Satin Nickel

Kitchen

Your kitchen is the heart of your home. It's the place where you start your day with an espresso or create your signature dish. Here, you can brighten recessed downlights and under-cabinet lights for cooking, then adjust island lights to a more subdued setting for dining.

Rather than having a row of switches lined up on the wall, eliminate wall clutter with the Palladiom keypad, which provides subtle elegance for any space.

Square Palladiom keypad
in Clear Black Glass

Remote control

Place the battery-powered Pico remote on a tabletop or use it as a hand-held remote. You can also mount it to any wall surface for an additional point of control (no wiring required).

TV room

Whether you're enjoying a romantic night in, or hosting a small party with friends, start the evening off with a playlist that suits the occasion.

You can incorporate audio into "scenes"—preset light, blind, and temperature levels that you can recall at the touch of a button.

You can also easily control any Sonos Home Sound System, or other select audio system, from the Pico remote for audio.

And you can integrate HomeWorks QS with your entertainment system, so you can conveniently control audio visual equipment with a button press.

Control from anywhere

HomeWorks QS brings the connected home to your fingertips. You can easily check and change the status of lights, blinds, and temperature from anywhere.

Bedroom

A great way to start your morning is waking up to a soft, gentle light. What makes that morning even better is when you don't have to get out of bed to control that light. With a HomeWorks QS tabletop keypad on a bedside table, you can adjust lights – and blinds – from the comfort of your bed.

Before you retire for the night, turn all the house lights off with the "Goodnight" button. Not only can you control the lights that surround you, but also the lights in other areas of your house – so you can rest assured no lights are left on, wasting energy.

RF seeTouch tabletop keypad in Midnight

Bathroom

Controls in your bathroom give you the ability to create a spa-like atmosphere – the perfect setting for a soothing bath or for softening the transition into your morning routine.

With one button press on a keypad, you can brighten overhead lights just enough for starting your day, or dim them for soaking in the tub when you want to unwind.

To ensure lights aren't inadvertently left on, add an occupancy sensor. The sensor automatically turns lights on when you enter the room, then turns them off when you leave.

Signature Series keypad in White

Radio Powr Savr occupancy sensor

Outdoor living

Your garden is like another room. And with HomeWorks QS, you can have the same subtle control of lighting outside as well as in. Adjust lights for drinks, barbecues, or relaxing by the pool on a warm summer evening. And use lights to dramatise architectural features and foundation plantings.

You can also use the timeclock to automatically turn on landscape and exterior lighting at dusk, dim it after you've gone to bed, and turn it off at sunrise.

4-button Pico wireless control

Control styles

You can choose keypad styles to complement a room's look and feel, and to coordinate with the overall design of your home.

Customisation

We understand that standard options do not always fit the bill, which is why we offer custom keypads.

Choose an existing custom design
Review options at **lutron.com/CustomControls**, then contact our customer service team for additional options. You can customise color, finish, and engraving on an existing custom design.

Create your own custom design
Send us a sketch or mark-up of an image of an existing Lutron control, then contact our customer service team to start a conversation. We will work with you on your idea's design parameters and feasibility.

Blind styles

Our motorised blinds are available in a variety of styles, giving you options for every room in your home.

Palladiom Roller Blinds

Palladiom roller blinds feature exposed bracket hardware designed specifically to be seen. The bracket, together with the roller tube's slender profile and carefully balanced bottom rail, take this distinctly crafted solution to new heights.

Roller Blinds

Lutron roller blinds complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room. (Battery-powered options are available.)

Insulating Honeycomb Blinds

Honeycomb blinds add richness to a space with their luxurious textures, as well as depth, thanks to their cellular design—which also provides superior insulation. (Battery-powered options are available.)

Our custom-made window treatments are available in a variety of fabrics, including sheer, dim-out, blackout, and soft fabrics. We also offer woven woods (for Roman blinds) and painted or stained wood or aluminium (for wood blinds). In addition, we can make blinds from your own material.

Horizontal Sheer Blinds

These blinds pair the soft elegance of a sheer with the precise control of a blind. Sheer layers also offer privacy, even when vanes are open.

Traditional Curtain Systems

Lutron curtain track systems electronically operate pinch pleat or ripplefold curtains to elegantly provide quiet, convenient control of daylight.

Roman Blinds

Our Roman blind systems allow for more reliable, smoother, and virtually silent movement of Roman blinds. These systems also offer the most fabric options; you can use any fabric you want for these blinds.

All blinds provide quiet control and precise alignment.

Blind styles

Tensioned Blinds

Our tensioned blinds provide solutions for skylights and angled windows. They reduce light gaps around fabric and maximise the view when opened by eliminating cable guides that are typical in skylight blinds.

Wood Blinds with Independent Lift and Tilt

Wood blinds are an attractive and effective way to ensure privacy, while still allowing sunlight to filter a space. Only Lutron wood blinds with Independent Lift and Tilt can offer precision alignment of both tilt and lift position between multiple blinds.

Kirbé Vertical Curtain System

The Kirbé vertical curtain system smoothly pulls fabric up and completely out of the way, providing greater access to windows and view and by eliminating stackback – the mass of fabric that gathers as traditional curtains are opened.

HomeWorks **QS**

Unparalleled Total Home Control

Now you've seen how HomeWorks QS can enhance the quality of your life. An investment in HomeWorks QS gives you the ability to control the light, audio visual systems, and temperature throughout your whole home, any time of day, from any location.

The question is not whether you need this level of convenience and control. The question is why you would accept anything less.

The Lutron difference

Because we have the highest confidence in the quality of our products, we back HomeWorks QS with an 8-year warranty. And our technical specialists are available 24 hours a day, 7 days a week.

When you invest in Lutron, your light levels will always be constant, thanks to our patented RTISS (Real Time Illumination Stability System). Our products are designed and rigorously tested to survive extreme electrical conditions, such as power surges and lightning strikes. And with Clear Connect technology – our latest advancement in reliable radio frequency communication – HomeWorks QS is suitable for existing homes or new construction.
